

**RAIMANTE®**

---

# RAIMANTE

---

RAIMANTE is an **innovative, high-performance, zero-impact** material that comes from the **reuse of composite fibers lamination scraps** with the **aim of reducing the environmental impact** of their disposal.

The **patented process** allows the production of **RAIMANTE** , which can be customized according to customers' unique needs.

At the same time **RAIMANTE** can be used to make products in any sector: automotive, nautical, food and beverage, fashion, furniture-design, luxury, etc. Every production step is carried out following the guidelines of the most exquisite Italian craftsmanship, sustainability and circular economy, thanks to **patents** registered in Italy and abroad.

---

## SCRAPS

---

The **lamination scraps of carbon fiber and other composite fibers**, out of which **RAIMANTE** products are made, mainly come from the production of components for racing cars and motorcycles (F1 and MotoGP), airplanes, racing yachts, bicycles, i.e. from those productions in which carbon fiber has a major and fundamental role.

We realize **unique** and **iconic objects**, thanks to our patent for coupling **RAIMANTE** with **leather scraps** coming from the automotive, fashion and furniture world.

---

## S U S T A I N A B I L I T Y

---

The disposal of any type of material involves pollution and, in the field of composite fibers, it represents an environmental problem of deep concern: nowadays these scraps are classified as special waste, ending their life cycle in landfills.

Thanks to **RAIMANTE** we can transform composite fiber scraps into a **sustainable material** with **zero environmental impact** since they are brought back into the production chain to produce a **new high-performance material**.

RAIMANTE is a **high** quality and **valuable** material produced according to the **upcycling philosophy**.

RAIMANTE has been designed for companies that target a **demanding and exclusive market**.

RAIMANTE is the first company to produce and supply a material made out of recycled carbon fiber with the possibility to create **unique and exclusive** finished products based on customers' needs.
